

# HOW-TO: Cover your own buttons

Your own fabric

Dritz Aluminum Cover Button Kit

button pusher

button back (eye hole showing)

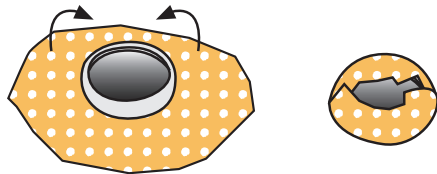

button front (inside showing)

button mold

step 1

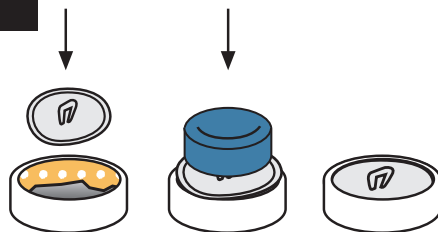

Place button front-side-down on fabric large enough to wrap around the sides and inside.

step 2

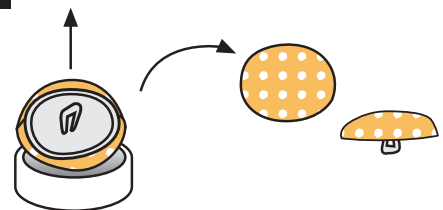

With your fingers, press the button wrapped in fabric into the button mold. Tug lightly on the fabric to be sure to remove wrinkles.

step 3

Position the button back over the mold, then place the button pusher over it. Press evenly downward to secure the back into the front.

step 4

With your fingers, press the button wrapped in fabric into the button mold. Tug lightly on the fabric to be sure to remove wrinkles.
